- (1) **Expected one-off costs:** Expected research and development and manufacturing commercialisation costs for the next quarter (1 October to 31 December 2016) comprise a number of large, one-off payments. The majority of these payments relate to absorbing the incremental costs of the MPC-150-IM Phase 3 program in advanced chronic heart failure. These payments are not expected to be incurred in subsequent quarters.
- (2) **Potential effect of corporate activities on cash reserves at the end of next quarter:** Mesoblast is in advanced negotiations with selected pharmaceutical companies with respect to potential partnering of certain Tier 1 product candidates. Mesoblast's Tier 1 product candidates are MPC-150-IM for chronic heart failure, MPC-06-ID for chronic low back pain and MSC-100-IV for graft versus host disease, all in ongoing Phase 3 clinical trials, and MPC-300-IV for biologic refractory rheumatoid arthritis and for diabetic nephropathy, both in Phase 2. Currently, negotiations are advanced but a binding transaction has not yet been entered into. If Mesoblast enters into a binding transaction in the second quarter of this financial year, Mesoblast expects that one effect of the transaction would be that its cash reserves would be likely to increase. Mesoblast does not make any representation or give any assurance that such a binding transaction will be entered into by the Company. Mesoblast has established an equity facility for up to A\$120 million/US\$90 million over 36 months, to be used at its discretion, to provide additional funds as required.
