INDEX TO EXHIBITS

Item	
99.1	Press release of Mesoblast Ltd, dated August 18, 2022.
99.2	Initial Director's Interest Notice, Jane C. Bell, dated August 18, 2022.
99.3	Final Director's Interest Notice, Shawn Cline Tomasello, dated August 18, 2022.

JANE BELL JOINS MESOBLAST BOARD

Melbourne, Australia; August 18 and New York, USA; August 17, 2022: Mesoblast Limited (ASX:MSB; Nasdaq:MESO), global leader in allogeneic cellular medicines for inflammatory diseases, today announced that it has appointed Jane Bell to its Board of Directors. Ms Bell is a banking and finance lawyer with 22 years of corporate finance expertise focussing on international investment transactions in the United States, Canada, Australia and the United Kingdom, including funds management, mergers, acquisitions, and divestments. She has served as a non-executive Director in a diverse range of highly regulated sectors including delivery of healthcare, life sciences, medical research, and funds management.

Ms Bell currently serves as Deputy Chair of Monash Health, one of Australia’s largest and most diverse public health service delivering more than 3.46 million episodes of care across an extensive network of hospitals, rehabilitation, aged care, community health and mental health facilities and a former Chair of Melbourne Health. From 2014 until 2021 she was a director of U Ethical, Australia’s first ethical funds manager with over \$1.2B of funds under management, and a member of its Investment Committee. She has also been a director of Hudson Institute of Medical Research, is currently a director of Amplia Therapeutics, and Chairs Advisory Groups for the Royal Australian and New Zealand College of Obstetricians and Melbourne Genomics Health Alliance.

Commenting on her appointment Ms Bell said “I look forward to joining the Mesoblast Board at such an exciting stage in the company’s transition to a commercial organization, with its deep cell therapy product pipeline. The potential FDA approval and launch in the US market of the first allogeneic cell therapy is an incredibly exciting opportunity for me to be involved with and I look forward to using my background and experience to make a strong contribution.”

In other board changes, Shawn Tomasello will retire after four years on the Board. Ms Tomasello said, “I am confident that Mesoblast will successfully execute commercially on its potential first product launch, and the promise of its leading edge technology and I’ll be following closely from the sidelines”.

Mesoblast Chairman Joseph Swedish welcomed Ms Bell to the Board and thanked Ms Tomasello for her contributions. Mr Swedish said “We are delighted to have Jane join Mesoblast as an Independent Non-Executive Director. She has extensive corporate finance experience and diverse involvement across a wide range of healthcare and corporate finance organizations.”

About Mesoblast

Mesoblast is a world leader in developing allogeneic (off-the-shelf) cellular medicines for the treatment of severe and life-threatening inflammatory conditions. The Company has leveraged its proprietary mesenchymal lineage cell therapy technology platform to establish a broad portfolio of late-stage product candidates which respond to severe inflammation by releasing anti-inflammatory factors that counter and modulate multiple effector arms of the immune system, resulting in significant reduction of the damaging inflammatory process.

Mesoblast has a strong and extensive global intellectual property portfolio with protection extending through to at least 2041 in all major markets. The Company’s proprietary manufacturing processes yield industrial-scale, cryopreserved, off-the-shelf, cellular medicines. These cell therapies, with defined pharmaceutical release criteria, are planned to be readily available to patients worldwide.

Mesoblast is developing product candidates for distinct indications based on its remestemcel-L and rexlemestrocel-L allogeneic stromal cell technology platforms. Remestemcel-L is being developed for inflammatory diseases in children and adults including steroid refractory acute graft versus host disease, biologic-resistant inflammatory bowel disease, and acute respiratory distress syndrome. Rexlemestrocel-L is in development for advanced chronic heart failure and chronic low back pain. Two products have been commercialized in Japan and Europe by Mesoblast’s licensees, and the Company has established commercial partnerships in Europe and China for certain Phase 3 assets.

Forward-Looking Statements

This press release includes forward-looking statements that relate to future events or our future financial performance and involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to differ materially from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. We make such forward-looking statements pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and other federal securities laws. Forward-looking statements should not be read as a guarantee of future performance or results, and actual results may differ from the results anticipated in these forward-looking statements, and the differences may be material and adverse. Forward-looking statements include, but are not limited to, statements about: the initiation, timing, progress and results of Mesoblast's preclinical and clinical studies, and Mesoblast's research and development programs; Mesoblast's ability to advance product candidates into, enroll and successfully complete, clinical studies, including multi-national clinical trials; Mesoblast's ability to advance its manufacturing capabilities; the timing or likelihood of regulatory filings and approvals (including BLA resubmission), manufacturing activities and product marketing activities, if any; the commercialization of Mesoblast's product candidates, if approved; regulatory or public perceptions and market acceptance surrounding the use of stem-cell based therapies; the potential for Mesoblast's product candidates, if any are approved, to be withdrawn from the market due to patient adverse events or deaths; the potential benefits of strategic collaboration agreements and Mesoblast's ability to enter into and maintain established strategic collaborations; Mesoblast's ability to establish and maintain intellectual property on its product candidates and Mesoblast's ability to successfully defend these in cases of alleged infringement; the scope of protection Mesoblast is able to establish and maintain for intellectual property rights covering its product candidates and technology; estimates of Mesoblast's expenses, future revenues, capital requirements and its needs for additional financing; Mesoblast's financial performance; developments relating to Mesoblast's competitors and industry; and the pricing and reimbursement of Mesoblast's product candidates, if approved. You should read this press release together with our risk factors, in our most recently filed reports with the SEC or on our website. Uncertainties and risks that may cause Mesoblast's actual results, performance or achievements to be materially different from those which may be expressed or implied by such statements, and accordingly, you should not place undue reliance on these forward-looking statements. We do not undertake any obligations to publicly update or revise any forward-looking statements, whether as a result of new information, future developments or otherwise.

Release authorized by the Chief Executive.
